

Compressed Air Connection Lockout

Seite 1 von 2

SECURE COMPRESSED AIR CONNECTIONS AGAINST UNINTENDED USE

With the P603 pneumatic lockout device.

It is plugged into the pneumatic connection and secured with a padlock. As a result, the connector won't fit on any socket and the maintainer can do their job safely.

Technologies

- Fiber-glass reinforced nylon: long-lasting, robust and non-conductive
- 3 different connections for most common compressed air couplings with up to 15 mm outside diameter
- The hole in the middle can be used to attach and store the lockout device directly at the connection
- Holds 1 padlock with 6.5 mm and 1 padlock with 7 mm shackle diameter per connection

Operation and use

- Block access to compressed air connections during maintenance

Variants

- Colour: Red
