

Xenon Flash Light (red)

Art.-Nr. SG1670

Seite 1 von 2

Flashing light visible from afar

The visual signalling device is a crucial component within a fully functioning alarm chain. In the event of an alarm, the coloured xenon flashing light flashes (70 times per minute) and is visible from afar. Easy installation indoors and outdoors The Xenon flashing lights can be installed inside and outside the building, as the robust plastic housing (IP 54) of the signalling device offers protection against splash water. The flashing light is supplied externally with 12 V. Depending on application, it is possible to choose between the three different light colours red (SG1670), yellow (SG1675) and blue (SG1680).

Technologies

- Including adapter for surface mounting
- Also for mounting on the SG1660 acoustic wired signalling device
- Protection class: IP54
- High flashing power
- Splash-proof

Technical data - Xenon Flash Light (red)

Colour	white
Current consumption	350 mA
DC power supply	12 V
Dimensions	(WxHxD) 175x110x75 mm
Flashing frequency	1.17 Hz
Height	110 mm
Housing material	ABS
Illuminant	Xenon
Length	75 mm
Light color	Red
Max. Operating temperature	55 °C
Min. operating temperature	-25 °C
