

Outdoor Motion Detector

Art.-Nr. AZBW20000

Seite 1 von 2

This outdoor motion detector is a passive infrared motion detector with dual PIR element. It reacts to all types of heat movement and reports these to an alarm centre or video surveillance system. The integrated PIR elements can be panned 180° and tilted 90°, meaning the detector can be installed in virtually any location. Installation positions opposite sources of heat are not suitable. Do not install the motion detector near electric cables, gas lines or electronic equipment that generates heat during long periods of operation. The angle of view on the outdoor motion detector is between 10° and 70°, whilst the detection range measures up to 30 metres (depending on the installation height).

Technologies

- Suitable for alarm and video monitoring systems
- Outdoor motion detector for perimeter monitoring
- Dual PIR element
- Detection range up to 30 m
- Protection class IP55
- Two potential-free outputs

Technical data - Outdoor Motion Detector

Compatible with	Secoris, Secvest, Terxon
Connections	3
Cover monitoring	No
Current consumption	8 mA
DC power supply	9-15 V
Depth	115 mm
Detection area detector (m)	8-30 m
Detection method	Heat detection

Outdoor Motion Detector

Art.-Nr. AZBW20000

Seite 2 von 2

Technical data - Outdoor Motion Detector

Dimensions	(BxHxT) 157x120x115 mm
Environmental class	III
Gross weight	0.442 kg
Height	120 mm
Housing material	Polyethylene HDPE
Length	115 mm
Max. Operating temperature	55 °C
Min. operating temperature	-20 °C
Mounting location	Wall
Mounting type	Surface mounted
Net weight	0.288 kg
PSTI conformity needed	No
Product group	Detectors
Protection class IP	55
Pulse selector switch	Yes
Sensor type	Dual PIR
Tamper monitoring	Yes
VdS class	without
WEEE group	09
width	157 mm
