

Screw Terminal Distributor Flush Mount, 5-pins (brown)

Art.-Nr. VT5001B

Seite 1 von 2

With a screw terminal distributor, you ensure clear wiring. Especially when installing several control panels and detectors, you should install a distributor at the nodes of your building. The surface-mounted screw terminal distributor is protected against tampering by its cover contact. It is available in the colours white and brown, with 5 (VT5000) and 8 (VT5100) double screw terminals. The respective screw terminal distributors are made of impact-resistant plastic.

Technologies

- Surface mounting
- Screw terminals for fast wiring
- Impact-resistant plastic
- High-quality design for professional installation
- Tamper-monitored

Technical data - Screw Terminal Distributor Flush Mount, 5-pins (brown)

Colour	brown
