

Screw Terminal Distributor Flush Mount, 12-pins (white)

Art.-Nr. VT5101W

Seite 1 von 2

Organisation made easy

The Terxon surface-mounted screw terminal distributor makes wiring easier and clearer. A distributor should be installed at the nodes of the building, especially when installing several keypads and detectors.

Discreet and tamper-protected

The surface-mounted screw terminal distributor is protected against tampering by its cover contact. It is available in the colours white and brown. The respective screw terminal distributors are made of impact-resistant plastic.

Technologies

- Fast wiring thanks to screw terminals
- Impact-resistant plastic
- Tamper-monitored by cover contact

Technical data - Screw Terminal Distributor Flush Mount, 12-pins (white)

Colour	white
Connections	12 screw connections
Depth	25 mm
Dimensions	(WxHxD) 65x65x25 mm
Height	65 mm
Housing material	ABS
Length	25 mm
Mounting location	Surface mounting
Mounting type	Surface mounted
Net weight	0.05 kg
PSTI conformity needed	No
