

LOCKS IN PLACE BY ITSELF

Universal additional security lock for windows. Assembly without drilling into the window wing.

Higher security for your windows does not automatically have to mean a high assembly effort. This securing device is fitted without drilling into the window. The bolt is pushed in front of the window wing from above. Once in position, the solid steel bolt reliably secures the window. Neither for locking nor for opening a key is necessary.

Technologies

- Solid steel bolt
- No drilling of window or door
- Fitting on the space next to window or door only
- Solid fixing and robust construction

Operation and use

- Universal window and door protection
- Self-locking
- The bolt is inserted manually to secure windows and doors
- To open the window or door, the bolt is withdrawn

Variants

- Finishes: brown, white
-

Technical data - SW20 white
