

Reflector strip JC6715 THEO

Seite 1 von 2

Your child has no eyes in the back?

... that's exactly right, and that's why we have our reflector strip THEO. Simply attach it to the backpack, school bag, etc., and your child is also clearly visible from behind.

In winter, autumn or when it rains or snows heavily, visibility is usually pretty poor. And the kids usually carry their satchels, school bags, backpacks or gym bags on their backs: To increase the visibility of boys and girls, it can be useful to attach our reflector strip THEO to the bags. THEO fits not only around school bags, but also around briefcases, sports bags and simply around all items that you want to mark or secure in a special way. And the practical Velcro fastener not only holds, but flexibly ensures good visibility on the other favourite bag the next day.

Technologies

- UV-resistant material (meets the requirements of the European standard EN2471), shines even after years of use.
- Two highly reflective stripes for very good visibility at night, but also very good visibility during the day.
- Visibility: 150 m
- Flexible thanks to the Velcro fastener (from approx. 82 to 108 cm circumference)

Operation and use

- Universal use: ideal for satchels, backpacks and other bags
- Increased safety from behind, as our MAX safety vest can cover a large area, for example, school bags, satchels or backpacks on the child's back

Tips

- An LED rear light can be attached to the ABUS bracket, for example JC6540 LINUS or JC6520 NILS
