

SECURITY WITH ABUS QUALITY

Even in the basic protection range, ABUS offers consistently outstanding quality. Both in terms of technology and choice of materials.

We recommend the TECTIC™ 496 Frame Lock for securing low-cost bikes. The bike lock offers good protection against low risk of theft and is classified as a security level 6 lock. The shackle, the housing and the structural parts of the TECTIC™ 496 Frame Lock's locking mechanism are manufactured from specially hardened steel. To keep your bike even more secure against theft, we recommend the use of a second lock in the form of an ABUS U-lock or chain lock.

Technologies

- 8.5 mm thick locking shackle
- The shackle, the case as well as supporting elements of the locking mechanism are made of specially hardened steel
- The R (key retaining) version holds the key when the lock is open, the NR (non key retaining) version allows taking the key out of the cylinder

Operation and use

- Good protection at low theft risk
- Recommended for the protection of low-range bicycles

Tips

- Frame locks are a convenient protection against unauthorized use of the bicycle
- The use of a second lock besides the frame lock is highly recommended
