

AFS625 fluorine-free Fire Stop

Fight the fire!

The fire extinguishing spray with fluorine-free* foam extinguishing agent without PFAS** additives is quickly ready for use and can be used to rapidly and safely extinguish a fire.

It happens before you know it: a fire in the kitchen! The oil in the pan is burning, the heat is rising, every second counts. Now it can be crucial to have a compact fire extinguisher to hand. The fire extinguisher spray Feuerstopp AFS625 fluorine-free is directed at the source of the fire from a safe distance of up to 3 metres and triggered like a standard spray can. The fire is extinguished within seconds. The spray time for the fire extinguishing agent is up to approx. 25 seconds. Made in Germany and ready for use for up to 10 years

Our fire extinguisher spray is manufactured in Germany and has a shelf life of up to 10 years from the date of manufacture.

With the fluorine-free ABUS Feuerstopp, you can fight incipient fires of fire classes 5A (solid and non-melting substances) and 5F (grease fires, cooking fats and cooking oils). Possible use cases are not only at home, but also in campers, motorhomes or caravans.

* Measured as organic fluorine using combustion ion chromatography; measured concentration: 1 ppm

** Per- and polyfluorinated alkyl substances

AFS625 fluorine-free Fire Stop

Seite 2 von 2

- Always follow the information on the product label.
- Without PFAS additives (perfluorinated and polyfluorinated alkyl substances) and fluorine-free: measured as organic fluorine using combustion ion chromatography; measured concentration below 1 ppm
- Extremely long shelf life: up to 10 years after date of manufacture
- Quickly ready for use: extinguisher agent jet is triggered by pressing down the spray head, similar to a spray can
- Spray range: up to 3 m spray range (max. distance between source of fire and user)
- Spray time: approx. 25 seconds
- Made in Germany
- Practical holder: optionally available for secure mounting within easy reach

Operation and use

- Use: suitable for fighting incipient fires of fire classes 5A and 5F
- Fire class 5A: solid and non-melting materials (wood, paper, textiles); an incipient fire on a wood pile with dimensions of approx. 54x50x50 cm (HxDxW) serves as reference
- Fire class 5F: Cooking fats and cooking oils; suitable for extinguishing grease fires (approx. 5 litres of cooking oil serve as reference)
- Ambient temperature for use: functional from 5° Celsius indoors and outdoors
- Use with electrical systems: only up to 1,000 volts (min. distance 1 m)
- Compact and easy to use: the fire extinguisher spray is used like a standard spray can
