TELESCOPIC CEILING BRACKET

Position your cameras perfectly!

This ceiling bracket is a robust and durable solution for mounting a camera indoors and outdoors. The aluminium construction ensures a high level of stability and integrates seamlessly into any environment with its subtle white colour scheme.

The compact mounting plate (diameter 109 mm) is used to securely attach the bracket to the ceiling, saving space. The height of the extendable bracket can be adjusted. This allows the position and distance of the camera from the ceiling to be adapted to the individual installation situation. The cable guide integrated into the bracket enables clean and professional installation, including optimum protection of the connecting cable against moisture, damage or tampering.

This ceiling bracket has a pendulum mounting for installation on sloping ceilings (fixed or loose).

The ceiling bracket is an optional accessory for various camera installation boxes from the ABUS portfolio. Please note the load capacity of up to 4.5 kg.

The ceiling bracket is available in two different lengths: 60 - 102 cm and 120 - 334 cm.

Technologies

- Telescopic ceiling bracket in 2 lengths: 60 - 120 cm or 120 - 334 cm
- Direct attachment of a camera installation box possible
- End with 3/4 thread for direct attachment of an installation box
- Pendulum mounting to compensate for sloping ceilings (can be fixed or loose)
