

---

Also for larger circuit breakers, circuit protectors and disconnectors with 480/600 V:

Electricians secure themselves and others against unintentional or unauthorised restarting during maintenance work.

E211 encloses the switch and prevents access by unauthorised persons by hooking in a padlock. The switch cannot be operated again until the padlock is removed.

---

## Technologies

- Polyamide, partly glass fibre reinforced: durable, resistant, non-conductive
- Easy to use with screw mechanism for safe (tool-free) mounting
- With enclosed adapter for flat fuses

## Operation and use

- Fuse protection for circuit breakers during maintenance work
  - Use without tools, simply attach and tighten with the hand wheel
  - For hanging a padlock with a shackle diameter of up to 7 mm
  - With adapter piece for better fixation
-

---

## Technical data - E211 #USA

|                               |               |
|-------------------------------|---------------|
| Depth                         | 50 mm         |
| Max. Width of Circuit Breaker | 40 mm         |
| Mounting Points               | 1             |
| Shackle Diameter              | 7 mm          |
| Weight                        | 55 g          |
| Width                         | 59 mm         |
| colour                        | red           |
| EAN                           | 4003318675195 |
