

QUICKLY MOUNTED

An electric door opener has to do one thing above all else, simply work. No one wants to spend time on complex assembly.

Are you looking for a robust door opener that can be operated at the touch of a button and quickly attached to the door of your apartment building, commercial property or business? This e-opener meets your requirements. Its latch can be easily aligned with the latch of the mortice lock used by means of only a minor construction measure. Once installed, the electric door opener offers a break-open strength of 3,000 Newtons, which is equivalent to over 300 kilograms.

Technologies

- Rated voltage 8 - 14 Volts, suitable for AC/DC
- Slim dimensions due to the symmetrical construction
- With latch adjustment
- Power consumption: 0,7 A bei 12 V AC
- Electric resistance: 14 Ω bei 12 V AC
- Resistance against attacks 3.000 N

Operation and use

- Universally suitable for DIN right and left doors
-

Technical data - ET70

Weight	177 g
colour	silver
EAN	4003318259173
