

FOR TENANTS AND HOMEOWNERS

The Vela reversible key system was developed especially for homeowners and apartment construction.

The Inspect System also detects locking authorisations in the interior of the cylinders and on the key, so you can always feel safe at home. Use just one key to open all the doors of your house, for example your front door, apartment door, letter box, cellar and shed. It is also possible to set up individual locking authorisations for each user of the key system.

Technologies
