

Keypad module for door intercom (stainless steel)

Art.-Nr. TVHS20030S

Seite 1 von 2

COMPLETELY MODULAR: THE VIDEO DOOR INTERCOM SYSTEM

See people in front of the door, speak to them, open the door. Easy to install, modularly adaptable to any building - e.g. with setup of keyless access.

Access without a key - with ModuVis

The numeric keypad module extends the ModuVis system (video module and other modules where applicable) with a keypad for entering a 6-digit PIN code. For keyless access to the building for residents (individual code) or authorised persons (e.g. caretaker with general code). This requires an electronic door opener connected to the video module.

Easy installation

The number keypad module is simply connected to the video module. This establishes the connection to the door buzzer, for example. Depending on the installation frame used, either surface- or flush-mounting are possible.

Fully modular, extensive expansion capability

A clear advantage: Depending on the number of flats and local requirements, modules can be simply added to the system. In addition to a number keypad, several bell button modules are also possible - for up to 49 residential parties. One ModuVis touch monitor is integrated for operation for each party.

Technologies

- Keypad module for ModuVis door intercom system
- Suitable for surface-mounted or flush-mounted frames
- 1 separate PIN code per residential unit (up to 49 PIN codes in the system)

Technical data - Keypad module for door intercom (stainless steel)

Alphanumeric keypad	Yes
Colour	Stainless steel
Depth	33.7 mm
Dimensions	98 × 99.8 × 33.7 mm
Height	99.8 mm
Length	33.7 mm
Max. Air humidity	0.95 %
Max. Operating temperature	60 °C
Min. operating temperature	-40 °C
Net weight	0.24 kg
PSTI conformity needed	No
Product group	Video
Protection class IP	65
WEEE group	09
width	98 mm
