34CS/55

PRECISION LOCK

Our padlock 34CS/55 is made of steel and has a shackle guard.

Grills, gates, doors or cellars that house larger value assets or have a high risk of theft can be reliably secured against break-in attempts with this padlock 34CS/55 with shackle guard. The body and shackle of the lock are made of hardened steel. A precision pin cylinder works inside. Tip: The 34CS/55 padlock is available as a lock-chain combination with the 10KS so that you can flexibly connect bicycles, motorbikes and more to a fixed object (for example to a lamppost or a robust fence that is firmly anchored to the ground) and protect them from theft if required.

Technologies

- Precision pin tumbler cylinder
- Body and shackle made from hardened alloy steel
- RK: cylinder can be re-keyed to match an existing key
- Shackle guard protects shackle from attack
- Constructed and tested according to CEN-class 4
- The cylinder cover is available separately

Operation and use

- To secure valuables/goods of greater value or at a high risk of theft
- To secure grates, doors, gates, cupboards, tool boxes, cellar windows, sheds, switch boxes, barriers, etc.
- Ideally used with ABUS-chains
