KEYLESS IS MORE

In the 2.0 version, the disc brake lock offers two innovations in addition to the proven mechanical security and smart technology of the predecessor product: an optimised Bluetooth® unit and a more sustainable battery model.

When the battery life has been exceeded, you can contact our customer service and have the battery replaced at the factory. Operation of the lock remains particularly secure and convenient thanks to the rechargeable battery, simple control via the ABUS One app and encrypted Bluetooth® communication between smartphone and lock. The proven ABUS SmartX technology, a loud alarm in the event of attempts to break open the lock and the 13.5 mm locking bolt made of specially hardened steel ensure the best possible theft protection.

The lock can also make your everyday life easier as you can use the ABUS One app to give other people permission to open the lock. This way, family members, colleagues or friends can help keep your motorbike safe by riding it home if you don't want to leave it unattended.

Technologies

- 13.5 mm locking bolt made of specially hardened steel
- Bike lock can be opened and locked without a key – keyless function based on proven ABUS SmartX Bluetooth® technology
- USB-C port
- Easy operation via the ABUS One app – for iOS and Android
- Storage of the motorbike's last parking location
- Alarm function with at least 100 dB for 15 seconds, then automatic re-arming
- 3D position detection – detects vibrations and the smallest of movements in all three dimensions and triggers an alarm
- The bolt, housing and structural parts of the locking mechanism are made of specially hardened steel
- Thanks to its automatic brake disc detection system, the lock can be transported closed without the alarm being activated
