ONE LOCK, DOUBLE THE FLEXIBILITY

You know that feeling of uncertainty when you park your bike outside? Even if you lock the frame to a lamppost, important components such as the front or rear wheel remain a potential target for thieves. Our patented Infinity Loop 1806 chain lock offers the solution.

With its innovative double-loop function, you can secure valuable components such as the front or rear wheel as well as the frame of your bike. With two size-adjustable loops, the Infinity Loop gives you significantly more options for connecting: Utilise the full length of the lock by forming a loop at each end. Tedious lashing and complicated handling are now a thing of the past. For even more flexibility, you can choose between a chain length of 110 cm or 140 cm.

The Infinity Loop is ideal if you want to connect two bikes together or use a bike rack for your car, for example. You can also easily secure a bicycle trailer, a cargo bike with a wealth of high-quality components or pushchairs, barbecues and high-quality appliances with the Infinity Loop.

Thanks to the highly flexible IvyTex synthetic fibre coating and the low weight, the lock is not only robust, but also practical for transport. It has never been easier to protect a bike and its components from theft - with just one lock.

Technologies

- 6 mm thick square chain
- Loop ring diameter 60 mm
- Double-loop function with two adjustable loops – one loop secures components such as the front or rear wheel, the other secures the bike frame
- Individually and infinitely adjustable length thanks to sliding lock body for flexible handling
- Durable and highly flexible IvyTex synthetic fibre coating protects the bike frame's paintwork from abrasion or scratches
- Quick locking without a key thanks to automatic locking – simply engage the sliding lock body

Use and application

- Patented lock with security level 6 offers reliable protection for a medium risk of theft
- For simultaneously securing the bicycle frame and other components

Infinity Loop 1806/110 black

Seite 2 von 2

-
- More range than conventional bike locks range when connecting with two freely adjustable loops
 - Instead of several locks, only one Infinity Loop is needed to secure the bike and its components or cargo bike
 - Or to secure several bikes with just one lock
 - A combination lock with lower weight and for easier transport
 - Also suitable for securing garden tools, outdoor furniture, high-quality tools, pushchairs etc.
