

AirDrop MIPS polar white S/M

FOR WHEN THINGS GET GNARLY

The AirDrop MIPS is the helmet for days when a half-shell won't cut it. Sessions in the bike park, riding big lines in the back country or enduro racing are all the domain of the AirDrop MIPS

Increased protection used to mean heavy, hot and claustrophobic full-face helmets, but not with the AirDrop MIPS. New technologies like our EVA collarbone protection inserts, breakaway visor attachments and side communication channels bring real benefits to bike parks and the backcountry.

Technologies

- Lower edge protection: polycarbonate (PC) outer shell covers the lower edge of the helmet and protects against scratches, impacts and signs of wear and tear
- Goggle Fit: defined area under the peak of the helmet to securely fix goggles so that they do not slip or fall off
- Mips layer: thin plastic shell located between the inner padding and the energy-absorbing shell of the helmet to counteract rotational forces in the event of a fall
- Ambient Sound Channels (ASC): specially placed channels at ear level – for clear hearing with full-face helmet
- Collarbone Protection: cushioning area at the bottom of the chin guard that protects the collarbone in the event of a fall
- Height-adjustable peak: the position of the peak can be adjusted thanks to locking positions to provide optimum protection from hanging branches and sunlight
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size
- Antibacterial Comfort Pads: soft, Velcro-fastened and antibacterial pad inserts – for a high level of comfort and

fewer bacteria

- Antibacterial Cheek Pads: Cheek Pads fixed with press studs – for more comfort, fewer bacteria, additional protection and a secure fit of the full-face helmet
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Double-D buckle: comfortable, wide straps are guided through two D-rings for fastening and are therefore infinitely variable and very precise to adjust – extremely reliable hold even with strong vibrations
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection

Technical data - AirDrop MIPS polar white S/M

Additional safety features	Ambient Sound Channels (ASC), Collarbone Protection
Chin buckle	Double-D buckle
Eyewear Port	Goggle Fit
Finish	matt
Forced Air Cooling	No
Head size	52-58 cm
Headring	Half ring
Helmet type	MTB helmet
Light	No
Lower edge	Yes
Mips	Yes
Peak	height adjustable peak
Ponytail Fit	No
Removable pads	Yes
Size	S/M
Suitable for	Adults
Washable pads	Yes
Weight [g]	790 g
color of facets	pink, white
design color	polar white
EAN	4003318692789
