A HELMET FOR ALL CONDITIONS

Technical singletrack, all-day gravel adventures or bikepacking are the domain of the Moventor 2.0 MIPS.

The Moventor 2.0 MIPS is the helmet for the rider that is defined by labels and appreciates the functionality of an adjustable visor. The Moventor 2.0 MIPS is lightweight, well ventilated and has a deeper fit that gives more protection at the back of the head. When the trail points upwards or the temps heat up, the ten air inlets and nine air outlets provide excellent ventilation. In addition to all the well thought-out features for off-road use, the helmet comes equipped with MIPS. for an extra layer of protection in the event of a fall.

Technologies

- Lower edge protection: polycarbonate (PC) outer shell covers the lower edge of the helmet and protects against scratches, impacts and signs of wear and tear
- Ponytail Fit: thanks to the opening in the height-adjustable adjustment system, the helmet is also suitable for long hairstyles such as ponytails, buns, or braids
- Mips layer: thin plastic shell located between the inner padding and the energy-absorbing shell of the helmet to counteract rotational forces in the event of a fall
- Reflector Sticker: for better visibility in the dark
- Height-adjustable peak: the position of the peak can be adjusted thanks to locking positions to provide optimum protection from hanging branches and sunlight
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size
- Trivider™: particularly flat divider with fixed positioning of the straps to prevent unintentional adjustment

Seite 2 von 2

- Comfort Pads: soft padded inserts for optimum comfort, attached to the helmet with Velcro
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Push-in buckle: for safe and practical handling, the straps are fitted with a classic chin lock (three-pronged connection) for opening and closing
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection

Technical data - Moventor 2.0 MIPS shiny white M

Additional safety features	Reflector Sticker
